Commentary (Q3/2006)

Green Target. The FY 2006 performance target is a 10 percent reduction from the baseline year, FY 2003, which yielded an 81-day median for filling FAA mission-critical positions (MCPs). Currently, the median for filling FAA MCPs is 57 days for FY 2006, October through June. This target measures the time-to-fill FAA MCPs from the date an action is requested to fill a position by the hiring organization, to the date a job is offered by the Office of Human Resources to the individual selected to fill the position. MCPs include: Transportation Specialists (2101s), Aviation Safety Inspectors (1825s), Information Technology Specialists (334/1550s), Electronic/Engineering Technicians (802/856s) and all Engineers (800s).
